Seo Hyun Aum

Atlanta, GA | 404 563 1277 | saum3@gatech.edu | https://seohyunaum.com/

EDUCATION

Georgia Institute of Technology

August 2021 ~ Present | Atlanta, GA

- B.S. Computer Science (Concentration: Intelligence & Info/Internetworks)
- Relevant Coursework: Machine Learning, Intro to Database Systems, Data Structures and Algorithms

EXPERIENCE

Student Web Developer

September 2022 ~ Present | Atlanta, GA

Georgia Institute of Technology

- Worked closely with clients to identify clients' needs and preferences, and incorporated their feedback into the redesign and migration of multiple Georgia Tech websites
- Developed websites in Drupal and WordPress to improve the digitalization of on-campus activities, labs, and student organizations
- Improved workflow of web development team by dividing tasks and prioritizing client needs

Computer Science and Mathematics Tutor

January 2022 ~ Present | Seoul, South Korea

Tublet Korea

- Guided students to excel in AP Calculus AB/BC and Computer Science with personalized lessons
- Create programming assignments to engage students' problem solving and coding abilities
- Improved students' ability, delivering exceptional results on AP tests and overall academic performance
- Integrated technology such as IDE's and interactive resources to enhance lesson time productivity

PROJECTS

Accelerating Materials Science with AI (MatDeepLearn)

January 2023 ~ Present

- Visualized and interpreted graph neural network embeddings to improve understanding of MatDeepLearn
- Researched relevant ML architectures, training methods, and datasets to improve accuracy and reduce costs
- Trained graph neural network prototypes to be utilized for inverse design

Plantomo, Google Developer Student Club 2023

January 2023 ~ Present

- Developed an iOS Unity game focused on educating children on local plants as a part of GDSC 2023
- Designed and implemented game features to enhance the educational value and fun of the game
- Scripted basic features in C# along with four team members to implement basic game features and tasks
- Skills: Unity game development, scripting, animation, UI/UX design

Restaurant Supply Express! Drone Delivery

Summer 2022

- Developed an object-oriented program in Java and SQL database modeling a restaurant supply application powered with drones leading a team of 4
- Constructed enhanced entity-relationship model, domain class, design class, sequence, and use case diagrams
- Applied SOLID and GRASP design principles and query writing skills to maximize efficiency

LEADERSHIP

President

August 2021 ~ Present | Atlanta, GA

Korean Undergraduate Student Association

- Lead 200+ Georgia Tech Korean American undergraduate students in activities and meetings
- Design visual content such as posters, stickers, and social media content while communicating and making adjustments with other club executives
- Coordinate tasks while planning events within team members, resulting in a highly-productive workflow

Program Director

January 2023 ~ Present | Atlanta, GA

Korean Computer Science

- Designed and develop organization portfolio as a website in JavaScript to improve club environment and announce club events to members
- Organize events and informations sessions to promote accessible programming education and information
- Manage projects and documentation of events as club executive

SKILLS

Programming

- Experienced in Python, Java, C, SQL
- Familiar in C, JavaScript, HTML, C++, PHP

Software

- Figma, Unity, Firebase, Git, Spark AR Studio, Adobe Illustrator, Adobe Photoshop, Canva
- Content Management Systems: Drupal, Wix, WordPress

Concepts

Object Oriented Programming, SOLID, GRASP, Database Design and Management, Data Structures Algorithms, Linear Algebra, Discrete Mathematics
